

Keep your money safe

I earned money for raking my neighbor's leaves. Now, I want to keep my money safe. Here are some things to remember.

If you are saving money at home, keep it in a safe place out of sight – like your wallet, savings bank or in a drawer, so that visitors don't see it.

If there is money that you won't need immediately, keep it in your savings account at Veridian Credit Union. A credit union is a safe place for your money, and you will also earn interest for keeping it there.

Your parents keep their money safe by using ways other than cash to pay for things. You may see them use a debit card, credit card or checks. This is a safe way to use money, because it stays in your account until you need it.
